*“Expect Xpertpack to come up with industry changing innovations before you need them”*

---

## Handling methods may decide your choice of packaging, containers or trucks.

We use the power of ideas to free industry of these constraints.

Between 2014-2018, Easyload-Xpertpack helped eliminate 9000 open top containers. Std. Dry containers were used which are cheaper, easier to find and safer for the transit of your goods.

*Industries catered*

Our products and services find application in most Industries. Let us know your problem and we will try to solve it.

## System Capabilities

Indian Industry is unique with its own peculiarities. We are still far from standardization. The logistics sector, though on fast track to implement best practices, is a challenge for loading and unloading processes. Trucks are non standard with varying height and floor specifications. So are the closed body trucks.

**Our loading unloading system can handle loads of up to 100 feet length with weights of over 100 tons over non-uniform truck surface, With a guarantee of over 98% uptime.**
